

KRISHNA UMESH NAIK

COMPUTER SCIENCE (AI & ML) STUDENT | FULL-STACK DEVELOPER

Mathikere, Bangalore | [+919353640765](tel:+919353640765) | kn670423@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Computer Science (AI & ML) student and full-stack developer with internship experience building web and mobile applications using React, React Native, Node.js, and PostgreSQL. Experienced in REST APIs, real-time systems, distributed computing, and AI-powered applications, with hands-on experience developing and deploying production-oriented software.

EDUCATION

Ramaiah Institute of Technology, Bengaluru, Karnataka

Bachelor of Engineering in Computer Science (AI & ML) | 2025 - present

Govt. Polytechnic, Siddapur (Uttara Kannada)

Diploma in Computer Science | 2024

Govt Mohan K Shetty P U college, Honnvar (Uttara Kannada)

Pre-University Course (PUC), Science | 2022

PROFESSIONAL EXPERIENCE

Software Engineer Intern | [Intelligent Development and Programming Pvt. Ltd.](#)

Jul 2026 - present

- Developed a cross-platform applications using React Native with flight tracking, real-time updates, push notifications, and airport assistance features using backend technologies NestJS, Redis BullMQ, Docker.
- Developed and integrated REST APIs, 3 external APIs for frontend and backend workflows.

Full-stack Development - Intern | [CanaraTechLabs Pvt Ltd](#)

Jan 2024 - Apr 2024

- Developed and maintained full-stack web and mobile applications using React, React Native, Node.js, NestJS, and PostgreSQL, implementing 30+ reusable components and REST APIs for production workflows.
- Built a multilingual news application with improved accessibility and translation support
- Contributed to Sprentzo Sports platform with interactive user engagement features

PROJECTS

– An SLM based Agentic AI Approach for Smart OS Management | Python, SLMs, RAG, NLP, Agentic AI

Developed a neuro-symbolic AI resource manager combining a local SLM, RAG, and safety rules for context-aware OS resource management, achieving 85% fewer user interruptions and reducing recovery latency from 8.5s to 1.2s.

– Sprentzo | React, Node.js, Express.js, PostgreSQL

Developed a full-stack sports equipment rental platform with an admin panel for managing equipment, rentals, and user operations.

– Hadoop–Spark Cluster | Hadoop, Apache Spark, Linux, HDFS

Implemented a multi-node Hadoop and Spark cluster for distributed data processing and large-scale dataset analysis.

– SmartKirana AI | React, Node.js, Express.js, PostgreSQL, FastAPI, OCR, LLM, REST APIs

Building an AI-powered retail management platform with OCR billing, voice input, WhatsApp-based NLP ordering, smart inventory tracking, and demand prediction.

– Explainable Generative AI for Hand-Drawn Diagram Generation | Python, PyTorch, OpenCV, Generative AI

Developed an explainable generative AI system that converts hand-drawn diagrams into structured digital representations while providing interpretable model outputs.

SKILLS

Programming Languages: Python, C, JavaScript, SQL, TypeScript, Java

Frontend: React.js, Next.js, Vite, Tailwind CSS, React Native

Backend: Node.js, Express.js, NestJS, Django, REST APIs, Redis, BullMQ

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Docker, Linux, Postman

Coursework: DSA, OOP, DBMS, OS, Computer Networks, Hadoop, Spark, Data Management

AI/ML: Machine Learning Deep Learning, Computer Vision.

Testing: Jest, Unit testing

ACHIEVEMENTS AND INTERESTS

- Active GitHub contributor with multiple software projects, 20+ repositories, 500+ commits, and 60+ pull requests
- Strong interest in AI/ML, Generative AI, Computer Vision, and NLP.
- Interested in Distributed Systems, Big Data, Cloud Computing, and Scalable System Design.
